

Emergency Patch: 2010.1.0935

August - September 2009

The following corrections and/or enhancements are included in emergency patch bundles for August/September 2009. This information will also be included in the .0939 patch bundle.

Emergency patches are used to fix a critically urgent issue, with delivery in an immediate time frame (e.g., the fix cannot wait for the next four week Patch Bundle). Emergency Patches are typically very small and usually contain a fix for a single reported issue.

The life cycle of an Emergency Patch ends as soon as the next Patch Bundle is delivered. It is recommended that customers apply all subsequent Patch Bundles immediately following Emergency Patches. Doing so will benefit both customers and Infinite Campus when it comes to supporting the patch.

Emergency Patches are cumulative, which means if a customer needs a correction in the latest patch available, but did not take any previous emergency patches, the customer's site will be updated to the latest patch available.

Below is a list of all Emergency Patches for 2010.1.0935 and the date of availability:

- 2010.1.0935.8 - September 23, 2009
- 2010.1.0935.7 - September 21, 2009
- 2010.1.0935.6 - September 16, 2009
- 2010.1.0935.5 - September 14, 2009
- 2010.1.0935.4 - September 9, 2009
- 2010.1.0935.3 - September 4, 2009
- 2010.1.0935.2 - September 2, 2009

[MSDS Early Roster and Request for UIC Null Reporting Values Causing Errors \(SIS-18122\)](#)

XML data output for the MSDS Early Roster and Request for UIC extracts were reporting element names for data not required to be reported. This was causing a validation error when districts attempted to upload data to the State. This has been corrected. The following is a list of changes made:

MSDS Early Roster

- CollectionName="Early Roster" was missing from the header section. This has been corrected.
- Data elements with no data (null) for the element within the Campus database will no longer report the element name in the XML output.
- CollectionID in the header section now reports a value of 85.
- Multiple Birth Order was incorrectly reporting data as a two digit character instead of a one digit value (i.e., Value 01 now reports as 1). This has been corrected.

Request for UIC Extract

- CollectionName="Request For UIC" was missing from the header section. This has been corrected.
- Data elements with no data (null) for the element within the Campus database will no longer report the element name in the XML output.
- Multiple Birth Order was incorrectly reporting data as a two digit character instead of a one digit value (i.e., Value 01 now reports as 1). This has been corrected.

Transaction Exclude Flag and Developmental Delay Codes (SIS-16730)

A student will be excluded from the following transactions when the student does not have a Birth State or Birth Country value when the Exclude Students with Missing Demographic Information flag is selected:

- 001 Enrollment
- 005 Personal Info

Also, DD: Developmental Delay has been added to all Special Education Disability dropdown lists. The following special education disabilities are no longer valid and have been renamed:

- PMD: PreSchl-Moderate Delay (Discontinued after 08-09)
- PSL: PreSchl-Speech/Lang Delay (Discontinued after 08-09)

Data conversion for 09-10 enrollments and Education Plans with a start date of 7/1/09 and later:

- Disabilities with a value of PMD: PreSchl-Moderate Delay have been converted to DD: Developmental Delay
- Disabilities with a value of PSL: PreSchl - Speech/Language Delay have been converted to SLI: Speech/Language Impairment

2009-2010 Survey 2 Logic Modifications (SIS-16915)

Logic has been modified for 2009-2010 Survey 2 reports. The following is a list of modifications made:

Student Demographic Report

- Students in school numbers of N998, N999 and 9997 were failing to report. This has been corrected.

English Language Learner Report

Assessment scores for Reading and Writing were not reporting correctly in fields 27-36. This has been corrected. The following are the corrected fields:

- 27: Test Name: Reading
- 28: Test Score Type: Reading
- 29: Test Subject Content: Reading
- 30: Test Score: Reading
- 31: Test Date: Reading
- 32: Test Name: Writing
- 33: Test Score Type: Writing
- 34: Test Subject Content: Writing
- 35: Test Score: Writing
- 36: Test Date: Writing

Exceptional Student Report

- If Primary Exceptionality = L and Exceptionality Other = all Z's, report 0000 in Field 22: Time with non disabled peers.
- If Primary Exceptionality = L and Exceptionality Other = all Z's, report Z in Field 8: IDEA Educational Environments.
- If Primary Exceptionality = L and Exceptionality Other = all Z's, report Z in Field 10, Alternate Assessments administered
- If Field 26: Survey Period Code is 1-5, Gifted Eligibility must be A, B or Z.
- If Field 28: Gifted Eligibility is A or B, Exceptionality, Primary or Exceptionality, Other must be L.

Student Assessment Report

- Field 7: Test Publication Year is incorrectly reporting 00-1 if no Test Detail Year is entered. This has been corrected. Field now reports as EX: XXXX where XXXX is the school year being reported.
- Field 12: Test Level now reports from Assessment tab > Test Detail > Grade Level. If null, value reports from Child's Test > Test Detail > Test Grade Level. If child test grade level is null, value reports from Parent Test > Test Detail > Test Grade Level. If Parent Test grade level is null, student's grade level will report.

Federal Stat Indicator Report

The following modifications have been made to end of the report, the Edit Detail Report and Edit Summary Report:

- Error Edit #22: Career and Professional Academy Identifier (Second) must exist on Appendix Y of the DOE Information Data Base Requirements: Volume I - Automated Student Information System Manual as a valid number for the District Number, Current Instruction/Service: CAPE (Second) or it must be ZZZ. For Survey Period 7, Career and Professional Academy Identifier

Values Added to Enrollment Location and Fiscal Agent Fields and Changes Made to FTE Data Collection (SIS-17812)

Values have been added to the Enrollment Location and Fiscal Agent fields. Modifications have also been made to the FTE Data Collection extract. The following is a list of changes made:

The following values have been added to the Enrollment Location dropdown list found in the State Reporting Fields section of a student enrollment record:

- 2: TCSG Campus
- 3: USG Campus

The following values have been added to the Fiscal Agent dropdown list found in the State Reporting Fields section of a student enrollment record:

- 2: TCSG
- 3: USG

FTE Data Collection

- FTE018-FTE023 Enrollment Location will report if Program Code = M, 6 or 7.
 - If Program Code is 6 or 7, Enrollment Location must report only 2 or 3. If Enrollment Location is not 2 or 3, report null.
- FTE024-FTE029 Fiscal Agent will report fiscal agent value if Program Code = M and Enrollment Location = 2: TCSG Campus and Fiscal Agent = 1 or 2. Otherwise, report null. Or report fiscal agent if Program Code = M and Enrollment Code = 3: USG Campus and Fiscal Agent = 1 or 3. Otherwise report null. If Program Code does not equal M for either scenario, report blank.

FRAM Verification and Letter Updates (SIS-8252)

The Verification Summary report and all Verification letters have been updated with the most recent USDA requirements. All references to food stamp have been changed to SNAP.

Logic on the Verification Summary report for the number of schools reported has been changed. Logic is now based on the schools assigned to a terminal. Each school assigned to a terminal indicates students who are eating in the in the district. Student enrollment records and school counts are now based off the schools assigned to a terminal. Users may view this information by going to Point of Sale > Terminals > Print All.

Path: Food Service > FRAM > Verification; Point of Sale > Terminals > Print All
Versions: 2009.2, 2010.1

FRAM Verification Modifications (SIS-14579)

The following modifications have been made to the FRAM Verification process:

- An application was being replaced with the same application. If there are no applications remaining in the qualified sample to replace an application in the sample pool, an error message will appear upon save that indicates there are no applications remaining to replace the application.
- Additional applications were being populated in the sample increasing the sample size incorrectly. In certain situations when the Verification end date was added and saved an additional application was populating in the sample pool.
- The latest application was not being included in the generated sample. If a household had more than one application for the year the qualified file did not include the latest application, but was selecting the first application entered. Additional logic has been added to account for other multiple application situations that can occur.
- A FreeReducedVerificationPool table has been created that stores qualified applications for each verification year based on a verificationID. Once Verification is run for the year, the table stores the qualified applications that are used for the sample pool. If an application is amended, excluded or deleted after Verification is run for the year, the changed application will not be added to the table. The table is a snap shot of the applications on file as of the date Verification is run. This data should not be changed or removed.
- If a household has an income application for two children and a categorical application for another child on file, both of these applications will be included in the qualified pool. However, the household will only be verified once for both applications. If this situation occurs and this household is selected to be verified, the application reference number will be displayed in black font below the application reference number pulled for verification. This will indicate there are two applications on file for the same household that need to be reviewed. Since USDA allows a household to fill out one paper application with income and categorical children, vendors are allowed to process two applications for this scenario since it is not possible for an application to

have two certified types. Based on a new USDA ruling dated 8/27/09, districts are now allowed to categorically certify all children in the household if there is at least one child with a case number, the situation described above should no longer occur.

Please see the Verification Best Practices guide for Verification processing instructions.

LEAD POPID Modifications (SIS-15373)

LEAD POPID logic has been modified and eligibility for LEP POPID 22 has also been modified. In addition, a new LEAD element has been added to the LEAD report and interface.

Overall POPID Logic

- Only POPIDs from students who are enrolled on the last day of class will be reported.
- If the LEAD report is generated for a time frame that does not correspond to the terms of a particular class, the report will still pull POPIDs from students who are enrolled on the last day of that class.

LEP POPID Logic

POPID of 22 (LEP) will only trigger under the following circumstances:

- At least one student is enrolled on the last day of class and has an active LEP record on the last day of class.
- The student's LEP record has at least one of the following value chosen in the Bilingual/ESL Type checkbox:
 - SEN: Structured English Immersion
 - CBE: Content-based ESL
 - SEI: Sheltered English Instruction
 - HLA: Heritage Language
 - CAT: Content area tutoring
 - DBE: Developmental bilingual education
 - POE: Pull-out ESL/Resource
 - PR: Parent refusal for services
 - SEN: Structured English immersion
 - TBI: Transitional bilingual immersion

- TWI: Two-way immersion

Special Type Data Element Addition

Student Gap Scheduler and Schedule Gap Filler Effective Date Logic Correction (SIS-17250)

The effective date field was pulling incorrect information for the Student Gap Scheduler and Schedule Gap Filler. A number of modifications were made to correct this issue as well as improve overall usability. The following is a list of changes made:

The Effective Date field will now auto populate for the Student Gap Scheduler and Schedule Gap Filler with the following:

- The current date if it falls within a term.
- If current date is not within a term, the start date of the next term will populate.
- If the current date is after the end of all terms within the calendar, no date will auto populate.

The user warning message for both the Student Gap Scheduler and Schedule Gap Filler has been updated to the following:

- “The effective date must be between the calendar start and end dates (calStart and calEnd). Also, if the student isn’t enrolled until after the effective date the student will not be returned in either reporting options.”

Schedule Grid

- Term dates have been added to both schedule grids.
- Term dates now print in a new row below the term name.

Headers have been updated on both reports to now display the enrollment effective date.

WDIS Student End of Term Status

- Field 20 Career Pathways Participant was incorrectly reporting data from the Tech Prep Participation field found in the state reporting fields section of an enrollment record. This has been corrected. This field now reports from the Career Pathways Participant field found in the same location.
- Consequently, the Tech Prep Participation field has been removed from the state reporting fields section.

MyData Giving IdentityID Error (SIS-17284)

Some of the MyData Demographic Requests were encountering an error message during the approval process. This was due to an interaction between the new federal race ethnicity editor and the MyData Requesting process. This has been corrected. Any existing requests that display the following error, " Security: identityID is a required field in IdentityRaceEthnicity" will need to be denied and resubmitted.

Updates Made to Survey F WDIS Reports (SIS-14736)

A number of updates have been made to the Survey F WDIS Student Reports. The file format has been updated for 2009-2010 and following is a list of updates made:

WDIS Student Demographic Report

- Field 2 has been changed from a filler field to Residency County. This field reports data from the Resident District field found in a enrollment record.
- Field 20 has been changed to a filler field with a length of 10 characters.
- New codes have been added and old codes have been deactivated for Field 21 Adult Student Goal. The following codes have been made inactive:
 - B: Improve Employment
 - G: Learn English
 - H: Join Military
 - J: Improve Basic Skills
- The following code has been added:
 - X: Default goal only
- Fields 32-37 now populate race ethnicities based on data reported in Field 11.

WDIS Vocational Student Course Report

- Field 11 is now Postsecondary Course Status.

WDIS Student End of Term Status

- Field 20 Career Pathways Participant was incorrectly reporting from the Tech Prep Participant field. This has been corrected. Data is now pulled from the Career Pathways Participant field found in the State Reporting Fields section of an enrollment record.

The Tech Prep field found in the State Reporting Fields section of an enrollment record has been removed as this data is no longer collected.
