

Preparing Today's Students for Tomorrow's Montana Workplace

Companies and community partners of all sizes recognize the importance of cultivating a workforce with a solid foundation in science, technology, engineering, and math (STEM). SAE International's A WORLD IN MOTION (AWIM) program is designed to engage, excite, and encourage all students to explore STEM subjects and careers. Participants will enjoy a hands-on session experiencing a comprehensive example of this National Gold Standard K-12 and Collegiate Program. Come see, today, what tomorrow will be like today in any one of Montana's communities and schools.
