According to the 2005 Dietary Guidelines, most Americans eat more salt than their bodies need. The Dietary Guidelines recommend having less than 1 teaspoon of salt per day.

Eating too much salt can increase your risk of having high blood pressure. High blood pressure can lead to stroke, coronary heart disease, and kidney disease.

One way to reduce your risk of having high blood pressure is to reduce the amount of salt you add to your foods. Try using seasonings other than salt to prepare your food.

### Tips for Using Herbs and Seasonings to Spice up Your Food

- **Herbs:** A little goes a long way. Use a small amount and mix the food, and then taste. You might not need as much as you think. When using dried herbs in a recipe that calls for fresh ones, use about \( \frac{1}{3} \) dried for the fresh herb amount.

- **Herbs and other seasonings** may seem to cost a lot at first. Since you are using a small amount at a time, you won’t have to buy them often.

- Look for “no-name” brand herbs and spices. They cost less and are just as good. You may find them in supermarkets or large discount stores that sell food items.

### Common Seasonings

<table>
<thead>
<tr>
<th>Seasoning</th>
<th>Foods to use it on</th>
<th>Tips</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basil</td>
<td>Pork, veal, potatoes, vegetables, rice, bread</td>
<td>*Basil has a sweet aroma and flavor.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>*Basil is a great seasoning to use with tomato products.</td>
</tr>
<tr>
<td>Garlic, fresh or powder</td>
<td>Any meat, fish, vegetables soups, bread, rice</td>
<td>Use garlic powder, not garlic salt.</td>
</tr>
<tr>
<td>Lemon, fresh or bottled lemon juice</td>
<td>Chicken, fish, vegetables</td>
<td>*Fresh lemon juice adds flavor that tastes like salt.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>*Sprinkle lemon juice on fish.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>*Add lemon juice to vegetables as they cook.</td>
</tr>
<tr>
<td>Onion, fresh or powder</td>
<td>Any meat, fish, vegetables soups, rice</td>
<td>Use onion powder, not onion salt.</td>
</tr>
<tr>
<td>Oregano</td>
<td>Pork, potatoes, rice, veal, vegetables</td>
<td>*Oregano is often used in sauces made with tomatoes and on pizza.</td>
</tr>
<tr>
<td>Sage</td>
<td>Beef, chicken, turkey, pork, rice, vegetables</td>
<td>Sage can be used when cooking vegetables and other foods instead of pork fat.</td>
</tr>
<tr>
<td>Thyme</td>
<td>Beef, chicken, turkey, pork, rice, vegetables</td>
<td>Thyme can be used when cooking vegetables and other foods instead of pork fat.</td>
</tr>

</table>

Turn the page over for more information on salt and sodium
USDA Foods now offer low sodium canned tomato products and canned dry beans. USDA will offer more low sodium vegetables in the future.

Questions and Answers about Table Salt and Sodium

What is table salt made of?

- Table Salt is made of sodium and chloride. Both are minerals, a chemical substance.
- Sodium is the part of table salt but too much may cause health problems for some people.
- Small amounts of sodium are found naturally in some foods like meat, poultry, dairy products and vegetables.

What will food labels tell you about sodium?

Nutrition Facts Label
- When reading a Nutrition Facts label on a food product, look for the sodium content. Foods that are low in sodium contain less than 140 mg per serving.

Ingredient Labels
- Labels list the ingredient that weighs the most first and the ingredient that weighs the least is listed last. So look for foods where sodium or salt is near the end of the list.

What are some foods that contain sodium?

Foods don’t have to taste salty to contain sodium. Most packaged or ready-to-eat foods contain some amount of sodium. This is important to remember when you think about your daily eating.

Sodium can be found in foods like:
- Processed Foods: canned vegetables, soups, luncheon meats, and frozen foods
- Natural Sources: meat, poultry, dairy products, and vegetables
- Snack Foods: juices, chips, granola bars, and popcorn
- Ketchup, mayonnaise, barbecue, soy, and tarter sauce
