

Critical Quality Educator Shortages

**Identification of Schools and Licensure and Endorsement Areas
Impacted by Critical Quality Educator Shortages
for the 2013-14 school year**

Report to the Board of Public Education
December 2013

Prepared by
Madalyn Quinlan, Chief of Staff
Linda Atwood, Operations Research Analyst
Montana Office of Public Instruction

opi.mt.gov

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

Background

The Quality Educator Loan Assistance Program is administered by the Board of Regents through the Office of the Commissioner of Higher Education. The program provides for the direct repayment of educational loans of eligible quality educators for up to 4 years. The total annual loan repayment assistance may not exceed \$3,000.

Educational loans are loans made by a federal loan program, excluding federal Parents Loans for Undergraduate Students (PLUS) loans.

A *quality educator* is defined as a full-time equivalent educator who holds a valid educator license or is a licensed professional providing services to students in a school district, an education cooperative, the Montana School for the Deaf and Blind, the Montana Youth Challenge Program or a state youth correctional facility.¹

In FY 2013, 192 teachers received quality educator loan repayment assistance totaling \$570,261. The appropriation for FY 2014 is \$738,000. The table below shows the number of teachers and the total amount of loan repayment assistance distributed since FY 2010.

Fiscal Year	Appropriation	Number of Recipients	Total Loan Assistance Provided
2010		163	\$471,753
2011		141	\$417,000
2012		166	\$494,890
2013		192	\$570,261
2014	\$738,000	246 (est.)	

Critical Quality Educator Shortages

Section 20-4-503, MCA directs the Board of Public Education, in consultation with the Office of Public Instruction, to identify:

- (a) specific schools that are impacted by critical quality educator shortages; and
- (b) within the schools identified in (a), the specific quality educator licensure or endorsement areas that are impacted by critical quality educator shortages.

Quality educators working in schools that are identified as impacted schools and teaching in licensure or endorsement areas that are impacted by critical quality educator shortages are eligible for loan repayment assistance.

The Board of Public Education is required to publish an annual report listing the schools and the licensure or endorsement areas identified as impacted by critical quality educator shortages, explaining the reasons that specific schools and licensure or

¹ The complete definition of a Quality Educator is in 20-4-501(4), MCA.

endorsement areas have been identified, and providing information regarding any success in retention.

Methodology for Identifying Critical Quality Educator Shortages

The methodology used by the OPI for identifying critical quality educator shortages includes a two-step process. The first step is to identify the schools that are impacted by critical shortages. The second step is to identify specific licensure and endorsement areas.

Identification of Impacted Schools

The OPI has developed a rubric for scoring the needs of schools based on three factors: rural isolation, economic disadvantage, and low student achievement. These three factors are weighted to set a threshold for identifying "impacted schools."

To measure rural isolation, economic disadvantage, and low student achievement, the OPI developed a 24 point rubric based on locale code, the percentage of students eligible for free and reduced price meals, and the improvement status of schools under No Child Left Behind. Schools are listed as impacted schools if they are more rural, have a higher percentage of economically disadvantaged students, and/or have greater challenges in closing the achievement gap.

Locale codes are used by the National Center for Education Statistics and the US Census Bureau to indicate the urban-rural nature of a school based upon population density and geographic location. The codes range from 11 to 43 based on population density and proximity to an urbanized area. (Appendix A provides an explanation of locale codes.) For this report, a school was assigned 4 "rural isolation" points if it has a locale code of 42-Rural, Distant and 8 points if it has a locale code of 43-Rural, Remote. All other Montana schools have a locale code indicating that the school is located in a small city, suburb, town or rural fringe; these schools were assigned zero points for rural isolation.²

The indicator of economic disadvantage that was chosen for this report is the number of Free/Reduced Price Participants as a percentage of total school enrollment. While this indicator has its flaws in that actual participation may fall short of eligibility, especially in the high schools grades, the OPI considers it to be the best and most current indicator of economic disadvantage among the school population. Schools were given a score of 0 to 8 "economic disadvantage" points depending on the percentage of students participating in free/reduced price meals.

² For 2012-13, there are 22 schools for which OPI assigned the locale code. Seventeen of these schools were opened or re-opened recently and do not have a current locale code. The remaining 5 schools use a mailing address in a larger community. Given that locale codes are assigned by the US Department of Education based on zip code, these districts are more isolated than is indicated by the zip code. OPI assigned the most rural locale codes to these schools for the purpose of this analysis.

The indicator of student achievement that was chosen for this report is the improvement status of schools under No Child Left Behind. Schools were given a score of 0 to 8 "improvement status" points depending on whether the school was identified as in need of improvement for 2012-13. If a school was not identified as in need of improvement, it is assigned zero improvement status points. If the school was identified as in need of improvement, the improvement status points increase from 1 point for a school in its first year of being identified for improvement to 8 points for a school in restructuring for four or more years.

Table 1 shows the rubric that was used to assign points to each school based on indicators of rural isolation, economic disadvantage, and improvement status.

Table 1. Scoring Rubric for Determining Impacted Schools

Scoring Rubric	Score
Rural Isolation	
Locale Code 13 - Small City	0
Locale Code 22 - Suburb, Mid-Size	0
Locale Code 23 - Suburb, Small	0
Locale Code 31 - Town, Fringe	0
Locale Code 33 - Town, Remote	0
Locale Code 41 - Rural, Fringe	0
Locale Code 42 - Rural, Distant	4
Locale Code 43 - Rural, Remote	8
Economic Disadvantage	
Free/Reduced % $\geq 10\%$	1
Free/Reduced % $\geq 20\%$	2
Free/Reduced % $\geq 30\%$	3
Free/Reduced % $\geq 40\%$	4
Free/Reduced % $\geq 50\%$	5
Free/Reduced % $\geq 60\%$	6
Free/Reduced % $\geq 70\%$	7
Free/Reduced % $\geq 80\%$	8
Improvement Status	
School Improvement Year 1	1
School Improvement Year 2	2
School Improvement Year 3 or more	3
Corrective Year 1	4
Restructuring Year 1	5
Restructuring Year 2	6
Restructuring Year 3	7
Restructuring Year 4 or more	8

Any school that has a total score of 8 points or more is listed as an impacted school. There are 592 schools on this list, of which 287 are elementary schools, 166 are middle schools or grade 7/8 schools, and 139 are high schools.

The Montana School for the Deaf and Blind, the Department of Corrections schools (Pine Hills and Riverside), the Montana Youth Challenge Program, and the state's 21 special education cooperatives were automatically added to the list of impacted schools. These entities are likely to employ a significant number of special education teachers (a category that is included in the specific quality educator endorsement areas).

Identification of specific quality educator licensure or endorsement areas

Each fall, schools report to the Office of Public Instruction regarding the challenges facing schools in filling vacancies for teachers, specialists, administrators and licensed professionals. These data are submitted on the District Personnel Recruitment report. The OPI relied on information submitted by schools through this report to determine the critical shortage areas for licensure and endorsement.

The District Personnel Recruitment Report provides an indication of the difficulty school districts face in recruiting licensed teachers with necessary endorsements. This report is completed annually by school districts as part of the Annual Data Collection submitted to the Office of Public Instruction. In this report, school administrators provide an indication of the difficulty they experience in hiring regular education teachers, special education teachers, school administrators, specialists, paraprofessionals, and other support staff. The statewide summary of the District Personnel Recruitment report for 2012-13 is shown in Appendix B.

The OPI used a weighted score for evaluating the data from the District Personnel Recruitment Report, which involved ranking hiring difficulty based on the degree of difficulty and the number of position vacancies. The degree of hiring difficulty was computed by adding the percentage of positions that were difficult to fill with those that districts were unable to fill. This combined percentage was then multiplied by the number of position openings. For example, school districts reported that of the 43 FTE vacancies for Music teachers statewide, 57% of the positions were difficult or very hard to fill. This resulted in a score of 25 points for Music openings.

Some education fields are relatively easy to fill, but because of the large number of openings, the education field receives a high score using the method described above. The most obvious example of this is elementary education. With 385 FTE reported openings in 2012-13 and 7% of the positions reported as difficult or very hard to fill, the elementary education field receives a weighting of 27.

To prevent an education field from being placed on the critical shortage list based on volume or difficulty alone, two additional criteria were added. For an education field to be included on the list of academic areas impacted by critical quality educator shortages, the education field must meet two conditions:

- At least 10 FTE openings were reported statewide;
- At least 25% of the positions were reported as difficult or very hard to fill.

Based upon the above criteria, the critical quality educator shortage areas for 2012-13 were Special Education, Career and Technical Education, Mathematics, Music, English,

Science, Speech-Language Pathologist, World Languages, Social Studies, Library, and Art.

In 2012-13, Montana school districts reported 1169 vacancies for all education fields and reported a total of 463 vacancies in these eleven areas.

Table 2. Education Fields Impacted by Critical Shortages in 2012-2013

Rank	Education Field	Total Vacancies ³	Percent Difficult or Very Hard to Fill	Weighted Score	Total FTE Employed ⁴
1	Special Education	82	61%	50	894
2	Career and Technical Education	66	67%	44	487
3	Mathematics	58	46%	27	615
4	Music	43	57%	25	362
5	English	81	26%	21	862
6	Science	34	46%	16	473
7	Speech-Language Pathologist	11	96%	11	238
8	World Languages	21	45%	10	154
9	Social Studies	31	27%	8	441
10	Library	20	32%	6	365
11	Art	16	25%	4	207

The District Personnel Recruitment report aligns with the K-12 educator licensure areas and the subject areas that districts are likely to post in their job openings. It should be noted that the responses from districts are subjective and may not always be complete.

If a licensed educator has a teaching assignment in one of the academic shortage areas listed in Table 2 and the educator teaches in an impacted school, the educator has met the initial eligibility criteria for the loan forgiveness program. (The teacher must also have an outstanding educational loan made by a federal loan program, excluding federal Parents Loans for Undergraduate Students (PLUS) loans.)

Eligibility for elementary teachers

In March 2013, the Board of Public Education adopted a recommendation from the Superintendent of Public Instruction to expand eligibility to elementary teachers in rural, high poverty areas. For 2013-14, elementary teachers in a special education cooperative or an impacted school that has a total score of 15 or higher are also eligible for the loan forgiveness program. There are 97 elementary and middle schools that meet the criteria.

³ Total vacancies as reported by public school districts, state-funded schools, and special education cooperatives on the District Personnel Recruitment Report for the 2012-13 Annual Data Collection

⁴ Total FTE Employed as reported by public school districts, state-funded schools and special education cooperatives on the Personnel Assignment report for the 2012-13 Annual Data Collection

Appendix A – Locale Codes

What are locale codes?

“Locale codes” are derived from a classification system originally developed by NCES in the 1980’s to describe a school’s location ranging from “large city” to “rural.” The codes are based on the physical location represented by an address that is matched against a geographic database maintained by the Census Bureau. This database is the Topographically Integrated and Geographically Encoded Referencing system, or TIGER. In 2005 and 2006, NCES supported work by the Census Bureau to redesign the original locale codes in light of changes in the U.S. population and the definition of key geographic concepts.

The locale codes are based on an address’s proximity to an urbanized area (a densely settled core with densely settled surrounding areas). The urban-centric locale code system classifies territory into four major types: city, suburban, town, and rural. Each type has three subcategories. For city and suburb, these are gradations of size – large, midsize, and small. Towns and rural areas are further distinguished by their distance from an urbanized area. They can be characterized as fringe, distant, or remote.

How are locale codes assigned to school districts?

A school district’s locale code is not assigned on the basis of the central office address. It is derived from the locale codes of the schools in the district. If 50 percent or more of the public school students attend schools with the same locale code, that locale code is assigned to the district. For example, if 60 percent of students were enrolled in schools with a “rural - distant” locale code, and 40 percent were enrolled in schools with a “town - small” locale code, the district would be assigned a “rural – distant” locale code. If no single locale code accounts for 50 percent of the students, then the major category (city, suburb, town, or rural) with the greatest percent of students determines the locale; the locale code assigned is the smallest or most remote subcategory for that category.

Urban-Centric Locale Codes

11 - City, Large:

Territory inside an urbanized area and inside a principal city with population of 250,000 or more.

12 - City, Midsize:

Territory inside an urbanized area and inside a principal city with population less than 250,000 and greater than or equal to 100,000.

13 - City, Small:

Territory inside an urbanized area and inside a principal city with population less than 100,000.

21 - Suburb, Large:

Territory outside a principal city and inside an urbanized area with population of 250,000 or more.

22 - Suburb, Midsize:

Territory outside a principal city and inside an urbanized area with population less than 250,000 and greater than or equal to 100,000.

23 - Suburb, Small:

Territory outside a principal city and inside an urbanized area with population less than 100,000.

31 - Town, Fringe:

Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.

32 - Town, Distant:

Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.

33 - Town, Remote:

Territory inside an urban cluster that is more than 35 miles from an urbanized area.

41 - Rural, Fringe:

Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster.

42 - Rural, Distant:

Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

43 - Rural, Remote:

Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.
